CUBAN BANKER NOW PLACES CROP AT 1,450,000 TONS

Willett & Gray's sugar journal for June 1 says of the raw sugar market:

The feature of the week under review has been the disposition on the part of both buyers and sellers to bridge over a rather easier condition of the market without having an actual decline in the quotations. This has been accomplished by sellers refraining from urging buyers to do business at less than the former basis of 21-2c. c. & f. 96-degree test, centrifugals (3.86c. landed), and whenever buyers would not willingly accept the quantities offered the sugars were warehoused. The refiners accepted the smaller parcels on sale at 2.86c. basis as they could not care for them and thus the market has safely passed over the temporary weak condition noted last week, and is apparently ready for some improvement on the next active business, especially for futures for shipment after the middle of June, which are now held at 23-16c. c. & f. 96-degree test (3.92c.), against spot sugar and prompt shipment at 21-2c. c. & f. (3.86c.). The demand is principally for shipment to New Orleans at present.

Following the advance made in the refined product today, we look for an early activity in raws. Beet quotations show an improvement from 10s. 33-4d. to 10s. 51-4d. for June, 10s. 6d. July, 10s. 63-4d. August. The Cuba crop moves along regular lines for its closing period. The returns from estates given elsewhere have reduced the output of 25 per cent. for 64 centrals, to below 29 per cent. for 92 centrals, with 78 centrals still to report.

The only fresh crop estimate put out this week was by a prominent Cuban banker of 1,450,000 tons. Our weekly Cuba cable gave island receipts 22,000 tons against 31,000 tons last week, 29,000 tons last year and 18,000 tons in 1909.

Heavy rains reported in some parts of the island; 18 centrals working, against 20 last year and 11 in 1909. All conditions are reported favorable for the next Cuba crop.

European beet crop advices are entirely favorable for the week. We print herewith a new estimate of sowings, made by the Statistical Union, being larger than the estimates of F. O. Licht and Otto Licht. All Europe is given 9.1 per cent. increase, against 4.1 per cent. by F. O. Licht and about 2 per cent. by Otto Licht.

Russia is given the notable increase of 17.9 per cent., against 9.33 per cent. and 3.38 per cent. by the others respectively.

The European beet season, as a whole, thus far began with backward and dry weather conditions, which latterly have been followed by good rains, improving crop prospects considerably.

Much has recently appeared about the plague in Java, and we are able herewith to give its condition reliably by our special correspondent's letter, just at hand. Also interesting and favorable crop report for same.

Statistics are changed somewhat this week, as given herewith, showing total stock in all principal countries 234,993 tons more than last year and 123,556 tons more than in 1909. European statistical countries are 240,190 tons more than in 1909.

There is nothing of special interest from other countries, with exception of a most interesting and instructive report on the sugar industry in the Philippines.

U. S. four ports receipts for week reduced to 40,579 tons, against 61,869 tons last week. Total stock in U. S. and Cuba together 552,292 tons, against 573,623 tons last week and 752,190 tons last year.

The parity difference between centrifugals and prompt beet is 34 cents per 100 lbs., leaving that much margin for adjustment later on.

New crop beet (October-December) is quoted at 9s. 71-2d., the parity of 4.61c. for centrifugals and only 15 cents per 100 lbs. above our present spot quotation. This price represents buy-

ers' estimate of value of distant sugars for September-December arrival.

Javas are offered moderately and on following basis: For first half July shipment (September arrival), at 10s. 101-2d. c. & f. (4.09c.); for all July at 10s. 9d. (4.06c.), and for August shipment at 10s. 71-2d., equal to 4.03c., with buyers at 10s. 6d.

At the close refiners accepted all the nearby sugars offered, fully 100,000 bags, at 3.86c., basis 96 degrees, at which the market closes firm.

CAMPBELL-WHITE OFF FOR ORIENT

Passed Through Honolulu and May Return for September Convention.

J. Campbell-White, secretary of the great Laymen's Missionary Movement and the real head of this remarkable latter-day crusade, passed through Honolulu on the Mongolia Monday on his way to the Orient and may return in September. If he does return, prominent laymen here are planning a big convention to include all the islands.

Campbell-White is going out to Japan and China and his present plans are to return to America by the trans-Siberian Railway and the Atlantic Ocean, but he may conclude to come back over the Pacific route. In Japan he will speak at the summer gathering of missionaries, and in China he is scheduled to address another of the missionary gatherings in the city where many of them spend the hot months in recuperating.

While here he was the guest of Theodore Richards and was taken out to the Central Union outing at Moanalua golf grounds.

Major A. M. Davis, in charge of the local army commissary department, met Campbell-White just a few minutes before the Mongolia sailed, after trying to locate him all day. Major Davis was identified with the Laymen's Missionary Movement in St. Louis and is enthusiastic over its practical workings. He was acquainted with Campbell-White on the mainland and in the few minutes' talk they had before the Mongolia sailed took up with him briefly plans for a possible convention here if the secretary comes back from the Orient this way. Campbell-White will cable to Major Davis later and then the prospects for the convention will be definitely known.

SHERIFF AND CHIEF OFF FOR MURDER SCENE

Reports of robbery, burglary and other minor cases are accumulating on the desk of Chief of Detectives McDuffie in his private office. In addition to working on them, he is investigating the cause of the murder of Kim Young Sun, the Korean who was mysteriously killed at Kahuku some time ago.

In order to ascertain more facts regarding this murder case, McDuffie and Sheriff Jarrett left today for Kahuku. They will stop at Heala-kai, where a coroner's inquest will be held at the place where Joseph Kalana was accidentally killed last Monday in the automobile accident. From there the two chiefs will proceed to Kahuku, where they will minutely question the witnesses who will be subpoenaed to appear before them to testify concerning the death of the Korean.

With lumber from Columbia River ports, the American schooner Min-doro is reported as having cleared Astoria yesterday, with destination as Honolulu.

M'QUAID DIVORCE TRIAL BEGUN TODAY

(Continued from Page 1)
that at one of the places where he saw McQuaid intoxicated 50 per cent. of those present were intoxicated, in which percentage the witness included himself.

In a period of over a year in which the Japanese stated that he had seen McQuaid frequently, he could not state positively to observing McQuaid intoxicated more than twice.

Under cross-examination by Attorney Coke, the Japanese admitted that he knew T. J. Driver, the father of V. C. Driver, whom McQuaid shot on November 5 last. The Japanese insisted, however, that he had never discussed the case with Driver senior, who came with him on the boat from Kona, but had borrowed money to come to Honolulu with the understanding that he would get in trouble if he did not obey the subpoena.

M. E. Scott was the next witness and he stated without qualification that through his acquaintance with McQuaid in Kona he had reached the conclusion that McQuaid was a steady drinker. Scott stated that he had seen McQuaid under the influence of liquor many times, asserting, however, that while McQuaid came to his house frequently, there were only two occasions when McQuaid visited the Scott home that the witness could detect that McQuaid had been drinking.

MANY JOURNEY ISLANDWARD

The Oceanic steamship Sierra due to arrive at Honolulu at an early hour on Friday morning is bringing down one hundred and five cabin passengers while eight additional are traveling in the steerage.

The lifting of the quarantine at Honolulu and the knowledge that the authorities of the island port are devoting money and energy to making the place a real spotless town have had the effect of stimulating travel to the Paradise of the Pacific, which is now regarded as one of the best places on earth for a summer vacation.

A wireless received at the agency of C. Brewer and Company this morning states that the vessel also has 1870 tons general cargo, 162 sacks mail and a quantity of Wells, Fargo Express matter.

The passengers include a large party of tourists. Many of them come from points as far away as Europe.

The most interesting party on the ship will be one composed of sorority girls from the University of California. There will be 13 of them, and with them will be many mandolins, much fudge and two chaperones. They purpose visiting the volcano and everything else in the Territory of Hawaii that they consider worth while.

The Sierra is in command of Chief Officer Trask.

WOMAN GUILTY

(Continued from Page 1)
that, in consideration of his former acquaintance with her family, he had given her small sums of money.

"Did you ever marry the defendant?" he was asked.

"No," was his answer.

"Did you ever make over any property for her use and benefit?"

Bishop again answered no.

Hazy About Marriage.

The defendant asserted that she was married to Bishop in this city, at a place where she had frequently lived, the exact situation of which she could not remember.

She said that a woman friend of hers was present—name forgotten—and that Bishop had a man with him, whose name was unknown.

She testified that she had not kept the marriage certificate. She did not remember whether the wedding took place eighteen or twenty years ago.

From questions asked by George Damon, who succeeded Nate Coghlan yesterday as the defendant's counsel it is expected that insanity will be the defense.

The hearing goes on this morning Bishop being one of the probable witnesses in rebuttal.

On the following day the Examiner said:

Helenmar "Bishop," who claims to be the wife of Charles R. Bishop, vice-president of the Bank of California, was found guilty yesterday by a jury in Superior Judge Lawler's court of obtaining money under false pretenses.

The defense put up for Mrs. Seal was insanity.

In instructing the jury Judge Lawler told them there could be but three verdicts in the case: Guilty as charged, guilty by reason of insanity and not guilty. After several hours' deliberation the jury returned a verdict of guilty as charged.

SHE SUFFERED FIVE YEARS

Finally Cured by Lydia E. Pinkham's Vegetable Compound.

Erie, Pa. — "I suffered for five years from female troubles and at last was almost helpless. I went to three doctors and they did me no good, so my sister advised me to try Lydia E. Pinkham's Vegetable Compound, and when I had taken only two bottles I could see a big change, so I took six bottles and I am now strong and well again. I don't know how to express my thanks for the good it has done me and I hope all suffering women will give Lydia E. Pinkham's Vegetable Compound a trial. It was worth its weight in gold."—Mrs. J. P. ENDLICH, R. F. D. No. 7, Erie, Pa.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases we know of, and thousands of voluntary testimonials are on file in the Pinkham laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaints, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. Every suffering woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial. If you want special advice write Mrs. Pinkham, Lynn, Mass., for it. It is free and always helpful.

BRINGS REPORTS FROM OIL FIELD

Good reports from the oil fields have been brought to Honolulu by I. L. Clark of the Norris-Midway company, who returned on the Wilhelmina yesterday, having spent two months in the oil section. He left here March 31.

Norris-Midway is now arranging for a combination drilling apparatus, says Mr. Clark, having struck a sand formation that prevents the use of the standard drill. A combination standard and rotary drill will be used. The drilling is very difficult, but the well is going down satisfactorily and Mr. Clark is enthusiastic over the prospects.

"That whole section is bringing in well after well," he said this morning, "and not a dry well has been recorded to date unless the boring was crooked."

Reports from the fields are that Honamua has struck oil at a depth of 1200 feet, in section 25, 31-22, the gravity being better than 45, but the yield so far not ascertained.

An oil bulletin from the Coast brings the information that Honolulu Consolidated have a well that gushes so hard even the presence of several lengths of drill pipe left in the hole fails to stop it. When workmen began removing the pipe, the oil at once geysered over the top of the derrick.

"News of big strikes may be expected at any time," said Clark this morning, "as the drilling is proceeding on a number of wells that local people are interested in."

MARKETING SUPERINTENDENT

(Continued from Page 1)

the growth and development of the Cochinella Valley for a number of years, and is at present one of the principal growers and marketing agents in the valley. He owns and controls the largest individual acreage of cotton planted near Cochinella. He bears the distinction of being the first man in the valley to put down a well into the deeper strata of water heretofore undeveloped, the success of which experiment has resulted in the sinking of numerous such wells, which give an enormous flow of water.

The government has just completed one for its Indian wards near Indio. Starrett is also promoter and principal owner of the Cochinella water system. He is horticultural inspector in this district, and has been largely instrumental in preventing the bringing in of injurious insects, and other pests.

Mr. Starrett is expected to arrive on the Sierra, July 7.

Armitage Is Promoted.

A deserved promotion has fallen to the lot of A. H. Armitage who for some time past has been connected with the accounting force at Castle and Cooke. Mr. Armitage has been transferred to the shipping department and will assume the duties heretofore performed by Frank Armstrong, who not takes over the position of cashier.

DRESS IN STYLE

Buy clothing that is known---clothing that is dependable. Be sure to get a make that has a reputation.

This is the most important feature for the man who would dress in style.

This Store handles only the best of everything. Men come here for the first arrivals, and depend on our judgment.

The **Carion**

RUSSIAN KNOCKS DOWN A HAWAIIAN

Domikoff, a subject of the Czar of Russia, was in Judge Monsarrat's court room this morning, charged with knocking down a Hawaiian woman, named Mrs. Mahuka. She was so seriously injured that it was necessary for some one to escort her to the witness stand. A special chair was provided for her.

According to the story of the complaining witness, it appeared that she was just getting off a street car, minka of Kawaiahao church, when without any warning, she was struck by Domikoff's bicycle, which happened along in great speed. The defendant, apparently did not think that Mrs. Mahuka was getting off the car, until it was too late for him to avoid the accident.

The court, after listening to the story of the defendant, found him guilty as charged, and sentenced him to pay a fine of five dollars and costs of court. He was unrepresented in court by attorney; but Mr. Martin Grune, who is well known locally, acted as interpreter for him.

WATERFRONT NOTES

Thetis Returned With Scientists.

After bucking contrary winds and seas, the United States revenue cutter Thetis returned from a special trip to Laysan Island, which required twelve days to complete. On the outward voyage the revenue cutter met with exceedingly favorable weather and was less than four days in reaching the bird island. The Thetis returned with a party of scientists including Professor H. R. Dill, C. A. Curwin, a scenic artist; Horace Young and Clarence Albrecht. Speaking of the trip, Professor Dill said: "We had a very successful trip and made a fine collection of birds, probably the finest ever brought into the United States and we also collected some nests, eggs and bushes to carry out the idea of reproducing Laysan Island in miniature in the Iowa University Museum." The Thetis will now be prepared for her cruise to the Arctic, where she will join the patrolling fleet of revenue cutters for the summer.

Buford Given Musical Farewell.

The United States army transport Buford with a large number of officers and enlisted men destined for Philippine army posts, resumed the voyage to the Orient at noon today. The transport was visited by a delegation of local army folk prior to the sailing. The Hawaiian Band played a repertoire of popular and patriotic airs, which were received with much

favor by the men who lined the rails of the steamer. Walter Skillcorn, the second assistant engineer in the Buford, who is well known here, did not accompany the troopship from San Francisco, it being currently reported that he was soon to take to himself a wife.

Hall In With Kaula Sugar.

The inter-island steamer W. G. Hall, was an early arrival this morning with the regulation 5500 sacks sugar and her cargo also included three automobiles, one motor cycle and 43 packages sundries. The Hall will remain over until Friday evening before sailing for a return to Garden Island ports.

Sugar on Kaula.

Purser Logan of the steamer W. G. Hall, an arrival at the port this morning, reports the following sugar awaiting shipment on Kaula: V. K. 1190; M. A. K. 31,045; G. & R. 800; McE. 34,504; K. K. B. 2100; K. S. M. 5670; K. P. 1100; M. S. Co. 6000; P. L. 13,473; G. F. 7624.

HILO POLICE STOP SKATERS

HILO, Hawaii, June 12.—No skating rink in the Hilo Armory on Sunday night, is the edict which has gone forth from the powers that be, and no sooner was the first glider sailing smoothly over the floor than Sheriff Pua's men were on hand and put an end to the performance. Eddie Fernandez, of Honolulu, who is working with Harry Werner, is the promoter of the rink here and will keep up the sport on week days, even if he is not allowed the Sunday privilege. The crowd which was on hand on Sunday night was a very large one and extremely anxious to try rollers.

GIRL COMES HERE TO WED KAHULUI R. R. MAN

Miss Lela E. Johnson, a graduate of the Berkeley High School, class of 1906, and daughter of Mr. and Mrs. Charles M. Johnson of 2317 Carlton street, sailed for Honolulu on the steamship Lorraine today from San Francisco. A week

Special Values in BATHING SUITS, CAPS AND SLIPPERS.

At

SACHS'

later she will become the wife of Theodore L. McNeill, a former resident of Berkeley, now connected with the Kahului Railroad Company.

Miss Johnson will be given in marriage by John Guild, an old friend of her father. The ceremony will take place in Honolulu. After spending a few days here, the couple will go to Maui, where they will make their home. McNeill left Berkeley a year ago to accept a responsible position with the Kahului company. He was employed in Berkeley as an engineer.

C. J. SCHOENING TO HAVE GARAGE ON MAUI

C. J. Schoening, the well-known and well-liked automobile man, is going into business for himself on Maui. "Charley" is going to open a garage at Wailuku. In connection with the garage he will also be the sub-agent for the von Hamm-Young company and will look after the interests of the company on the Valley island. Schoening has many friends here who will help him to get the tourist trade on Maui.
